SUMMARY

Skilled Python Fullstack Developer experienced in building user-friendly web applications, designing end-to-end solutions, and writing clean, efficient code. Eager to collaborate on innovative projects with cross-functional teams.

WORK EXPERIENCE

Product Developer , KyleSolution Pvt Ltd

Nov 2024 - Present

- Developed user interfaces using React and its core concepts
- Customized existing ERPNext modules to meet specific business requirements.

Social Media Executive , Vaidehikha Collections

Sep 2024 - Nov 2024

- Created engaging social media content (posts, reels, stories) to increase brand awareness and audience engagement.
- Edited and produced high-quality videos for various platforms.

Python Full Stack Development Intern, Futura Labs Technologies LLP

Oct 2023 - Apr 2024

- Utilized ReactJS to build dynamic and responsive web applications.
- Designed and developed robust backend APIs using Python and frameworks like Django.

PROJECTS

Future Studio

- Users can upload images, select frame styles, and customize print options like size, media, paper type, and border depth.
- React frontend communicates with Django backend via DRF-based APIs for image management, frame options, and order placement.
- Configured Nginx reverse proxy to serve both the React frontend and Django backend.

Point-of-Sale (POS) System for Restaurant

- Developed a custom POS system using React, Redux, and ERPNext for seamless restaurant order management.
- Created a payment workflow, generating Sales Invoices and Payment Entries automatically in ERPNext.

Plan My Trip

- Developed website for hotels, homestays villas and holiday packages.
- Front-end is developed using React-JS and back-end is developed using Python.
